

# Local wildlife hunt

*Earlier this week, Year 6 went on a wildlife hunt to find living things in our local environment.*

*Our aim was to sort each of the specimens we identified using a classification key.*

*We found examples of three of Linnaeus's five Kingdoms: Plantae, Animalia and Fungi.*

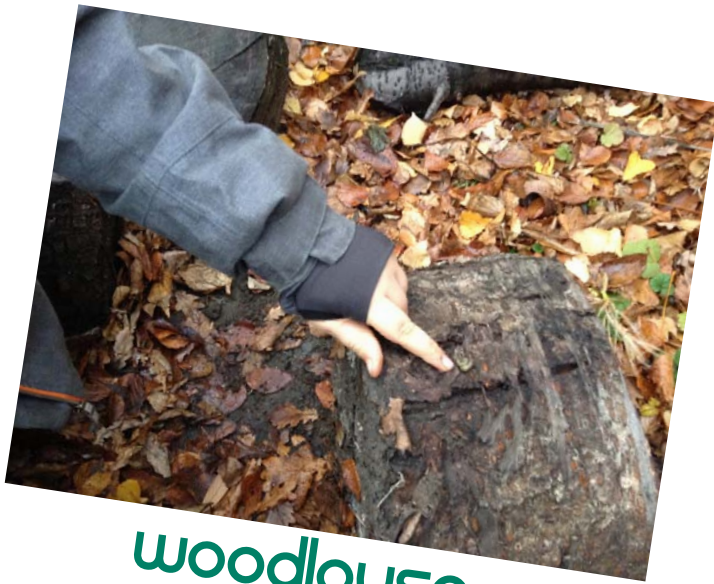

We found these in living things in our school playground. Can you create a key to classify them?

moss

worm

woodlouse

fungi

tree

bush
