

# ABC

Year 5 had an exciting and busy Maths Week! We designed and created our own maths-themed board games and had a fantastic time playing them with the Reception children. We explored tessellation and turned our learning into colourful pieces of art. We also became detectives as we solved tricky maths mystery questions, measured the perimeter of different shapes, and constructed 3D shapes from nets. It was a fun-filled week full of creativity, problem-solving, and teamwork!
