

## Challenge 1

True or False?

The truck and the train are the same length because they are both 4 bricks long.

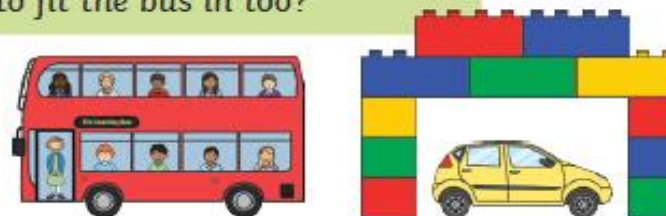

The height of the doll's house is 10 blocks.

Both boxes are 3 cars long.

## Challenge 2

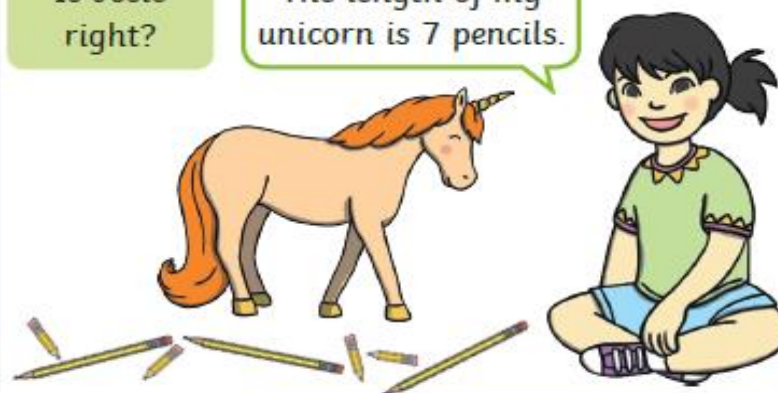

How can this 'garage' be fixed to fit the bus in too?

Can you use cubes, building bricks or other 'real objects' to build it?

Is Josie right?

The length of my unicorn is 7 pencils.

Can you give her some top tips?
