

Look carefully at a bird you can see where you live – your balcony or garden if you have one, or maybe a park?

How is the bird you have seen different from others?			
What is the same?			
How big is it?			
How does it fly, walk, hop?			
What colour are its feathers?			
What is its body shape?			
What does its beak look like – long or short, straight or curved, pointed or like a wedge?
