

My DT cookie homework

By Lucas

I mixed up the following ingredients in a mixing bowl such as :

- Self-raising flour
- Butter
- Sugar

Don't forget my secret ingredients (not very secret anymore.) Choc-chips and vanilla essence.

After I made the mixture, i rolled it up into six balls and carefully placed them on baking paper on a tray. I got a wet fork and used it to flatten the balls.

They came out fresh and the sides were a gold colour. I could smell the vanilla essence.

Questions

These would appeal to my Dad because he loves a cookie no matter what.

The vanilla essence made the mixture more runny and it smelt way better.

I would like to add cocoa powder to make it more sweet and chocolatey.

The choc-chips made the texture more bumpy.
