

# Amazing Art!

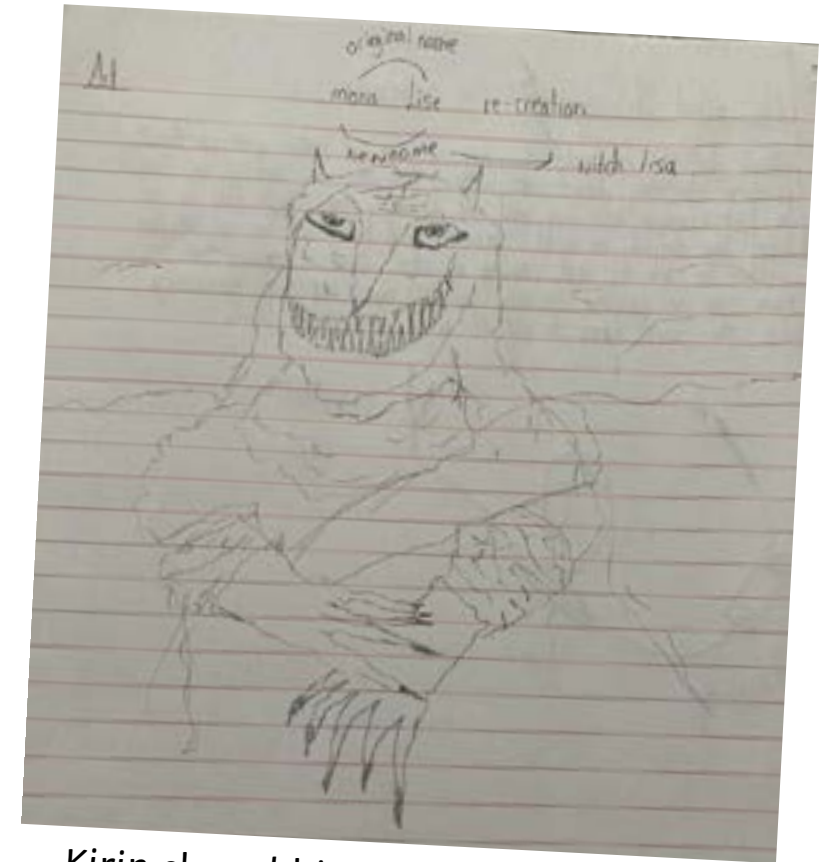

Both Amelie and Lewis chose to recreate 'Sunflowers' by Vincent van Gogh.

They weren't the only ones to choose van Gogh...

Felix decided to recreate his famous 'Starry Night' painting.

Kirin shared his representation of the Mona Lisa - he calls it the 'Witch Lisa'

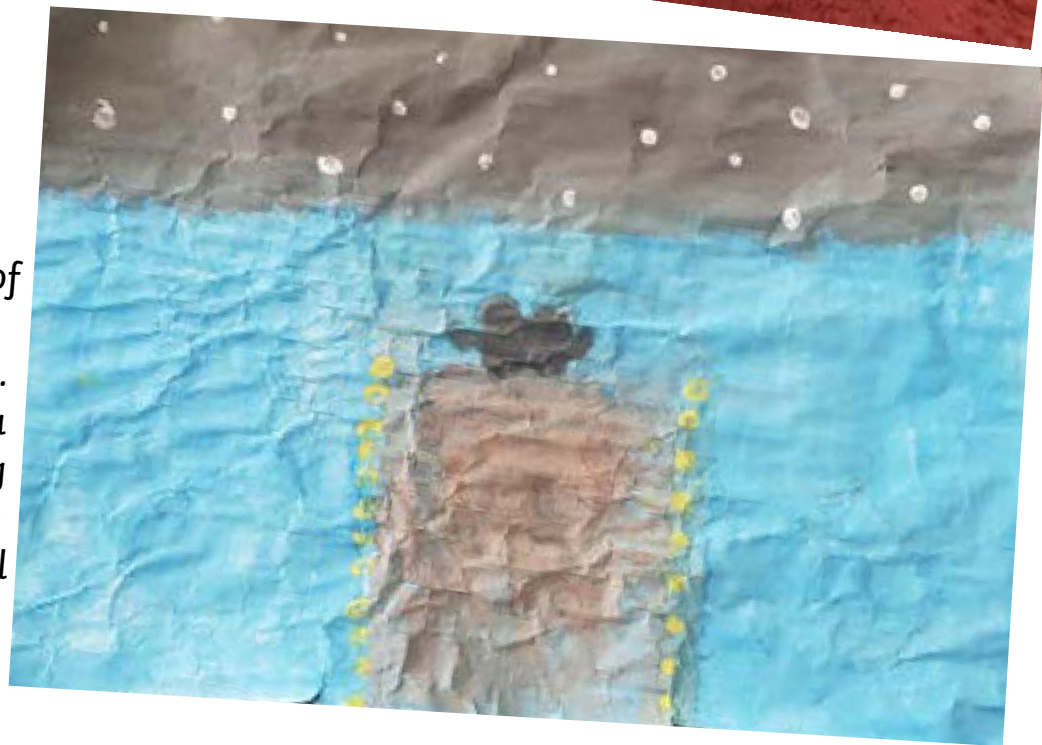

Harry created a 3D 'Griever' from the Maze Runner books. He says: "I like these books because they are a fantasy series."

Sophie created a sculpture of a scene from 'A Series of Unfortunate Events'. She says: "It shows the three siblings climbing down a secret underground tunnel they have just discovered! In the tunnel is a cage with their missing friends Duncan and Isadora Quagmire inside!"

Siann created her own piece of art, which she describes as: "... two people on a bridge watching the golden stars above the crystal blue sea, with bright lights."

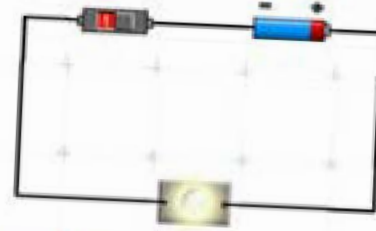

# Sensational Science!

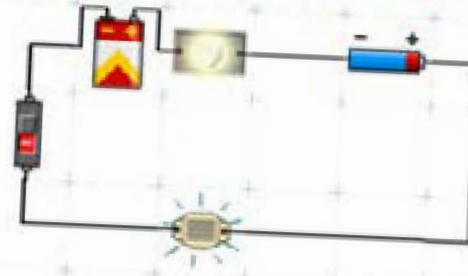

## Aaron's science project

On circuit world I created 3 circuits, a basic one, a moderately complex one and a complicated one.

Basic: This one has a: cell, bulb and a switch

Moderately complex: This one has a: battery, lamp, cell, buzzer and switch.

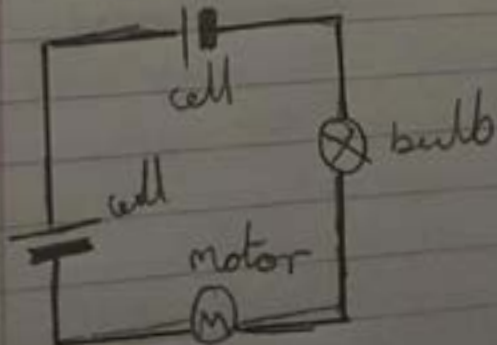

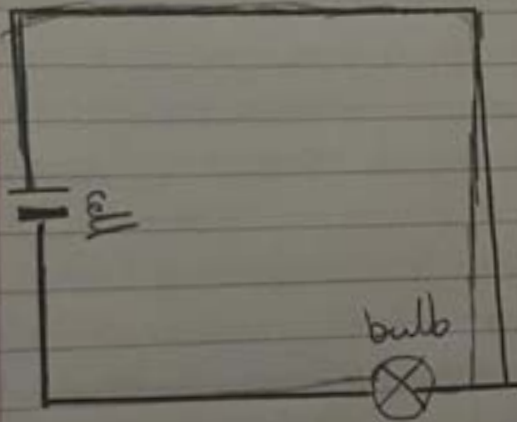

Complex: This one has: 5 batteries, 2 lamps and a motor.

### Electricity

Maria

If I have learnt that if you add to many cells your lamp/bulb can crash. So I put only one cell with a bulb and two cells with a motor. When I added a battery and took a cell away the bulb smashed.

# THE HISTORY OF SCIENCE

This is my project on rocket science and how the rocket takes us up to deep, dark space.

So it started of with a Chinese war to scare evil spirits and used dynamite sticks to destroy church on the opposite side! After that in Tudor times there was a young maths teacher who loved stargazing and once found the moon and thought of how to get to the moon after being in jail for 10 years for wanting to plot King James I.

A few centuries later, there was a man in the late 50's a French storyteller wrote wonderful books like around the world in 80 days. But one day the man wrote a book of how cannon shot a rocket to the moon before Galileo made his amazing discoverie and he published the book. Known as father of rockets Constantine Tsiolkovsky created the rocket but a few years later Robert Hutchings Goddard created the first ever rocket about 2-4 metres tall liquid powered rockets.

Now I know what you thinking but milk actually is the key to all rockets because when milk comes out it is all sour but this farmer discovered a way for it to not be sour using a tube the shape of the bottom of rockets we see today. The reason is because if it is one long tube it doesn't beat the gravtational pull but if you use a twearer to make about 1/3 of the tube and make it as small as you can so the steam because it is smaller the steam would go faster like there is a short queue for the ice-cream truck so it can go faster to beat the strong gravitational pull so that's what they do with milk. But their was a man that the Germans had to create rockets the man was called Von Braun he tried his best until he Made the v2.

It went 400mph and 244 miles in the air until it landed right into London killing 3 people. But that wasn't the first rocket. Over 5000 killed over 17000 injured over 4000 rockets were dropped

. During the time of Von Braun, a Siberian man who was a In a gulag had an unexpected turn of events from prisoner to General. You know Constantin well this Siberian man launched the rocket ship Constantin created well this Siberian built the first ever rocket with little rockets attached if this Siberian man didn't make it Neil Armstrong wouldn't have been first man on the moon because Apollo 11 was the rocket Constantin created.

Iran, Georgia, Syria

Asia Asia Asia

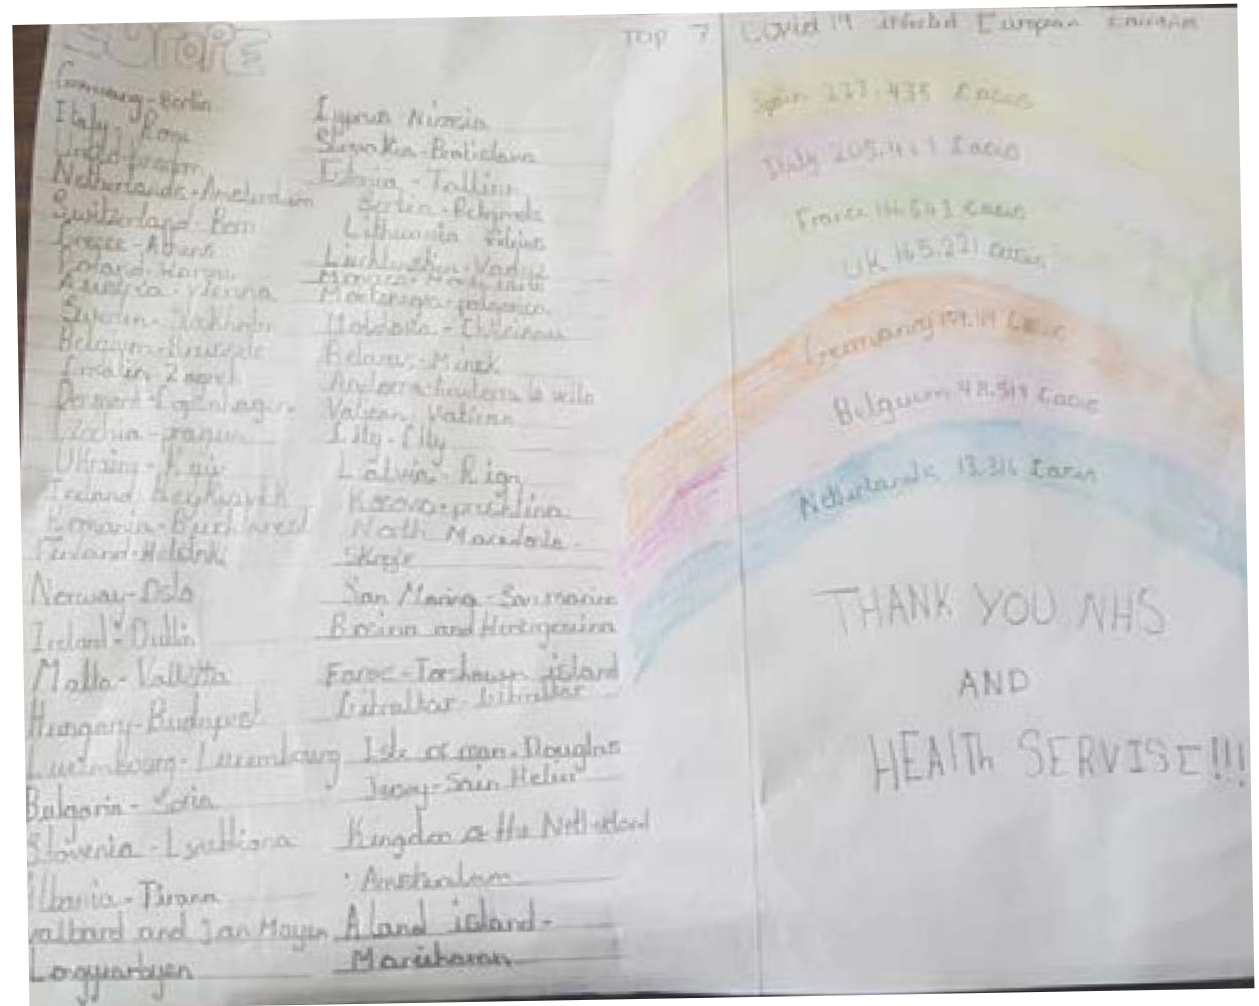

Malaysia, Dubai, Taiwan

Asia Asia Asia

Jordan, Yemen, Oman

Yamina wrote lyrics to a song about Asia.

# Terrific Topic!

Siann chose Europe. She said: "I looked at how many people have been effected by the coronavirus in Europe. I picked the top 7 countries that have been effected by Covid 19 and how many cases have been reported."

# Aaron created a powerpoint on Asia.

## The Continent of Asia

Japan

Japan is one of the 78 countries to drive on the left side of the road.

Indonesia

Indonesia has over 700 regional languages.

China

China has the largest population of any country in the world, 1.428 billion.

India

The Indian national anthem is called Jai Gana Mana.

Thailand

It is a 14th flight to Thailand from England.

South Korea

South Korea has one of the world's most militarised borders.

Vietnam

Vietnam is one of the largest rice exporters in the world.

Singapore

One in six people in Singapore are millionaires.

Philippines

Philippines' GDP is \$1.130 trillion.

Malaysia

Kuala Lumpur is the capital city.

Hong Kong

Hong Kong used to be part of the UK.

Laos

Laos' currency is called the Lao Kip.

Iraq

Iraq is a rich country due to oil reserves.

UAE

The UAE has the tallest building in the world.

Iran

Iran is part of Asia, however it's in the Middle East.

Pakistan

Pakistan's currency is called the Pakistani Rupee.

Israel

Their official language is Hebrew.

Cambodia

Cambodia is a dictatorship, ruled by Hun Sen.

Myanmar

Myanmar used to be known as Burma.

Maldives

The Maldives is a popular tourist destination.

Taiwan

Taiwan's population is 23,780,452.

Sri Lanka

Sri Lanka is an island.

Mongolia

Ghengis Khan was born in Mongolia.

Nepal

Nepal is the only country in the world without a rectangular flag.

Bangladesh

Bangladesh used to be part of India.

Afghanistan

Afghanistan is famous for its pomegranates.

Syria

42% of Syrians are muslims.

Armenia

It is a 14.25h flight to Armenia.

North Korea

North Korea's supreme leader is Kim-jon-um.

Brunei

Brunei is the 4th smallest country in Asia.

Uzbekistan

Uzbekistan used to be part of the soviet union.

Qatar

There is a Formula 1 race in the capital city of Qatar.
