Maths

LO: Substitution

**The video of this lesson is available here – Summer
Term – Week 7 - lesson 3**

**This link works on the printable version and is
available above the PowerPoint.**

**You will need to watch this video to learn the
skills you need in this lesson.**

The independent work continues on the next two slides. There are 6 questions and 1 extension.

(Español – nueve preguntas y una extensión)

*The chili suggests a good starting point.
If you have time you can complete all the independent work!*

Substitution

1

 = 4  = 5

Use the given facts to work out the calculations.

a)  +  + 

b)  +  - 

c)  +  +  +  + 

2

 = 12  = 5

Use the given facts to work out the calculations.

a)  - 

b)  × 

c) Create your own calculation that will be equal to 22

3

If $x = 5$, write the values of the expressions in the corresponding grid.

The first one has been done for you.

$3x$	x^2	$2x - 5$
$4x + 2$	$\frac{x}{2}$	$2(x + 1)$
$7x$	$x + 9$	$x - 7$

15		

4

If $a = 10$ and $b = 6$, work out the values of the expressions.

a) $a + b =$

d) $2a + b =$

b) $a - b =$

e) $3a - 17 =$

c) $2a =$

f) $2(a - b) =$

5

If $m = \frac{4}{5}$ and $k = 0.1$, work out the value of $m + 2k$

6

Mo

It does not matter what p and q are, $p + q$ and $q + p$ will always give the same answer.

Do you agree with Mo? _____

Explain your answer.

7

$$m = 7 \quad n = 5$$

Write $>$, $<$ or $=$ to compare the expressions.

a) $2m$ ○ 10

b) $n - 1$ ○ 5

c) $2n + m$ ○ $2m + n$

d) $7n$ ○ $5m$

8

$$a = 10$$

Write the expressions in order, starting with the smallest value.

$$5a$$

$$a + 5$$

$$\frac{a}{5}$$

$$a^2$$

9

$$a = 15$$

Write three different algebraic expressions that give a value of 40

Ext:

Complete the table.

x	$5x$	$5x - 1$
2		
10		
12		
	25	
		34
		99

The next two slides contain the answers should you wish to check you work and reflect on what you understand.

Substitution

1

 = 4  = 5

Use the given facts to work out the calculations.

a)  +  + 

13

b)  +  - 

3

c)  +  +  +  + 

23

2

 = 12  = 5

Use the given facts to work out the calculations.

a)  - 

7

b)  × 

60

c) Create your own calculation that will be equal to 22

e.g. $\triangle + \square + \square$

3

If $x = 5$, write the values of the expressions in the corresponding grid.

The first one has been done for you.

$3x$	x^2	$2x - 5$
$4x + 2$	$\frac{x}{2}$	$2(x + 1)$
$7x$	$x + 9$	$x - 7$

15	25	5
22	2.5	12
35	14	-2

4

If $a = 10$ and $b = 6$, work out the values of the expressions.

a) $a + b = 16$

d) $2a + b = 26$

b) $a - b = 4$

e) $3a - 17 = 13$

c) $2a = 20$

f) $2(a - b) = 8$

5

If $m = \frac{4}{5}$ and $k = 0.1$, work out the value of $m + 2k$

1

6

Mo

It does not matter what p and q are, $p + q$ and $q + p$ will always give the same answer.

Do you agree with Mo? Yes

Explain your answer.

Addition is commutative.

7

$$m = 7 \quad n = 5$$

Write $>$, $<$ or $=$ to compare the expressions.

a) $2m$ $>$ 10

b) $n - 1$ $<$ 5

c) $2n + m$ $<$ $2m + n$

d) $7n$ $=$ $5m$

8

$$a = 10$$

Write the expressions in order, starting with the smallest value.

$5a$	$a + 5$	$\frac{a}{5}$	a^2
$\frac{a}{5}$	$a + 5$	$5a$	a^2

9

$$a = 15$$

Write three different algebraic expressions that give a value of 40
e.g.

$2a + 10$ $3a - 5$ $\frac{8a}{3}$

Ext:

Complete the table.

x	$5x$	$5x - 1$
2	10	9
10	50	49
12	60	59
5	25	24
7	35	34
20	100	99
